## Work Experience

### **Web Developer: Russell & Bromley, London May 2021 – present**

Work extensively with HTML, CSS, JavaScript, and Knockout.JS to maintain website. Collaborate to create responsive, re-usable custom widgets using best practises for UX, Web Design and Development, SEO, performance and optimisation of assets. Collaborate with the external Oracle OCX development team to maintain good quality clean code. Version control and work flow using Git and internal scripts. Communicating and collaborating within the Development team, and other teams to deliver projects for the website and wider business. Mentoring the Junior CRO Developer giving feedback and support. Being proactive about self-development and personal growth. Raise and manage tickets through Azure Dev-ops. Work analytically to create the most efficient and effective solution to each problem. Solving bugs and issues on the website in a timely and efficient manner. Use excellent communication skills to describe technical processes to non-technical colleagues, keeping everyone in the loop. Regular presentations at weekly team meetings where each team presents projects, tasks or general information specific to their team for the wider office to engage in or learn from.

### **Web Developer (Contract): Lara Oz Therapies, London 2020 – May 2021**

Created a website for Lara Oz Therapies, London from concept to production using Wordpress, ACF and Contact Form 7. The client is evolving their business to focus on online presence and group classes. Build fully custom theme on Wordpress which is cross-browser compatible and responsive. Optimised assets (logo, images). Contact form with validation and ReCAPTCHA integration. Fully custom Google Maps integration including all locations of services. Brand guardianship: maintaining brand consistency and feel throughout the site. Assets and content management and optimisation to give client autonomy over updates and edits. Providing support and problem solving where needed. Communicating at key stages and working collaboratively to integrate clients ideas, and inspire her creative process with my own knowledge and experiences.

### **Freelance Web Developer: London 2019 – May 2021**

Using HTML, CSS, JavaScript, Wordpress and PHP to produce stylish and functional websites. Working with APIs to integrate with required services. Understanding the needs of the client and the project. Communicating ideas in an understandable way.
